PROJECTS

Tourism Managment System

These Project Based On Provide a Complete Tourism Solution .

Like Flight Booking,Hotels Booking etc.the aim of these project people can Easily Book the Ticket.

1.In These Project We are Using Serveral Technology Like Php,MySQL,Html ,Css etc.

2.Php Use as the backend And provide Connection With Mysql and Perform the different Crud Operation .

3.By Using the Html css,and Javascript we create the User Interface and make the Responsive.

4.In These Project Provide the Different Functionality To User and Admin.

5.Admin have to authority to add different flight Routes and Hotels These is Only Done By the Admin only.

6.The Objective Of these Project Develop The Automates System

Cocktail Website

These Project Based on the cocktail Website In These Project We get The Cocktail Details from API by Using the Fetch method .By Using These Project we Enhance our Redux skills and Manage the State

1.Navigation bar First we create the responsive Navigation bar Using React And css user interface And Bootstrap.

2.In the 2nd Step part we Create the Card to Show the Cocktails Details

3.We use the Redux to Manage the State Single Cocktails or Multiple Array.We get the data as Array of an Object.BY Using Reducer we Create the State,Pending,Fullfilled,Rejected

4.We map the element Array of An object to Get the Details of Coctails.

5.We also Find Details of each Cocktails.
